

## Web Development

### Certification 🎓

Full Stack Web Development  
*The University of Texas at Austin - 2022*

### Technologies

JavaScript (ES6)  
React  
GraphQL  
SQL / MongoDB  
Node.js / Express.js  
CSS / Bootstrap / Bulma  
Semantic HTML  
Git

### Skills

MERN Stack  
PWAs / SPAs  
Reading documentation  
AGILE  
AJAX / RESTful APIs  
MVC  
OOP / TDD  
Heroku / GitHub

## Projects

### *Travel.Diary*

A web application that hosts user made blog posts detailing travel stories and tips, featuring search and save functionality. It was developed by a team of 4, and completed in less than 2 weeks. My role was primarily creating the server and REST API using Node / Express, and displaying data to the pages using Handlebars. This app was built with a MVC design, utilizing a SQL database, and Bootstrap / CSS for the front-end.

## Experience

### 2013 - 2022

Cashier / Food Prep / Driver  
**The Soup Peddler** - Austin, TX

- Advanced customer service skills learned through trial by fire in a restaurant environment.
- Advanced teamwork skills and a strong work ethic developed in a small workforce within a small company.
- Experience in the food service industry gained by serving soup and making smoothies for a diverse clientele through 9 Texas winters.
- Widely applicable time management techniques learned from driving the company van for home deliveries and store resupply throughout Austin.

### 2006 - 2013

Cashier / Cart Wrangler  
**H-E-B Groceries** - Bee Cave, TX

- Basic customer service skills learned through trial by fire in a supermarket environment.
- Basic teamwork skills and a solid work ethic developed in a large workforce within a large company.
- Experience in manual labor gained by rounding up shopping carts through 7 Texas summers.

### Education 🎓

A.A. Degree in Foreign Language: French  
*Austin Community College - 2013*

### 2010 - present

Musician / Audio Engineer  
**Self-employed** - Austin, TX

- Learned to work in fast-paced, chaotic environments, alongside a wide spectrum of colorful humans as collaborators, band mates, crew mates, and clients.
- Ran live sound for weddings and music performances, and recorded bands and dialogue for audio books.
- Learned flexibility when it comes to finding creative solutions to unrehearsed problems.
- Trained in critical analysis of audio:
  - In musical terms: how harmony and rhythm affect us on an emotional level, both for entertainment and work productivity.
  - In engineering terms: how dynamics, balance of frequencies, and strategic use of ear candy can enhance an audio experience.
