About

Full stack web developer leveraging experience in audio engineering to deliver creative solutions in a wide range of project types. I recently earned my certificate from the Code Bootcamp at UT Austin, specializing in MERN stack. With excellent time management, work ethic, attention to detail, and customer service skills learned in the unpredictable environments of the music and food service industries, I am both flexible and quick to adapt to new and changing work settings. I am well known as reliable, friendly, and easy to work with in both large and small scale teams, and am highly responsible and productive when working independently. I am excited to enter the diverse field of web development and offer my unique perspective and problem solving experience.

Skills

Certification 🎓
