## About

Full stack web developer leveraging over a decade of experience in audio engineering to provide creative solutions in website development and design. Recently earning a certificate from the Code Bootcamp at UT Austin, specializing in JavaScript and the MERN stack, Stephen is ready to offer excellent time management, work ethic, and attention to detail to a wide range of professional projects. Being reliable, passionate, quick to adapt, and known by colleagues as friendly and easy to work with in both large and small scale teams, as well as highly responsible and productive when working independently, Stephen is excited to advance his experience in the diverse field of web development.

## Projects

### Project Title: *Travel Diary*

🌐 <https://afternoon-harbor-62644.herokuapp.com/>

- A web application that hosts user made blog posts detailing travel stories and tips, featuring search and save functionality.
- Developed by a team of 4, my role was primarily creating the server and REST API using Node and Express, and displaying data to the pages using Handlebars.
- This app was built with a MVC design, utilizing a SQL database, Bootstrap/CSS for the front-end, Node/Express for the back-end, and is deployed to Heroku.

## Experience

### 2010 - Present

Audio Engineer / Musician / Producer

*Various - Austin, TX*

- Recording, mixing, mastering, and producing audio with DAW software, including Pro Tools, Ableton Live, Print Music, and various processing plug-ins.
- Working in chaotic and rapid fire production/performance settings, both in the studio and on stage.
- Intuition in finding creative solutions to unrehearsed problems.

### 2013 - Present
