Projects

Travel Diary
🌐 afternoon-harbor-62644.herokuapp.com

- A web application that hosts user made blog posts detailing travel stories and tips, featuring search and save functionality.
- Developed by a team of 4, my role was primarily creating the server and REST API using Node and Express, and displaying data to the pages using Handlebars.
- This app was built with a MVC design, utilizing a SQL database, Bootstrap/CSS for the front-end, Node/Express for the back-end, and is deployed to Heroku.

SpaceX Launch Info
🌐 strudelandcoffee.github.io/group-project

- A web application that displays details on upcoming launches from the SpaceX open API.
- Developed by a team of 4, my role was writing the API requests and displaying info to the dashboard using JavaScript, and implementing modals and style using Bootstrap.

Vintage, Etc.
🌐 github.com/strudelAndCoffee/vintage-etc

- A backend-only demonstration of CRUD operations on an SQL database using a REST API.
- Created using Node, Express, and Sequelize for a weekly assignment in the Code Bootcamp.

Do You Even Code..? Quiz
🌐 strudelandcoffee.github.io/do-you-even-code-quiz

- A simple, web based coding quiz with timer and high score storage.
- Created using JavaScript, CSS, and HTML for a weekly assignment in the Code Bootcamp.
